PERSONAL INFORMATION

I am a first-year Ph.D. student in computer science at Michigan State University, where I am advised by **Dr. Sijia Liu**. I am interested in the optimization foundation of **trustworthy and scalable machine learning**, including the optimization theories to improve the robustness, explainability, fairness, and scalability of current machine learning algorithms.

EDUCATION

Doctor of Computer Science <i>Michigan State University, East Lansing, USA</i> Advisor: Dr. Sijia Liu	01 2022 — Present
Bachelor of Engineering in Automation and Mechanical Engineering <i>Huazhong University of Science and Technology</i>	09 2015 — 06 2019

PUBLICATIONS

Conference Papers

- [1] **Yihua Zhang***, Yuguang Yao*, Parikshit Ram, Pu Zhao, Tianlong Chen, Mingyi Hong, Yanzhi Wang, Sijia Liu, "[Advancing Model Pruning via Bi-level Optimization](#)", 36th Conference on Neural Information Processing Systems (NeurIPS'22), [PDF], [Code].
- [2] Guanhua Zhang*, **Yihua Zhang***, Yang Zhang, Wenqi Fan, Qing Li, Sijia Liu, Shiyu Chang "[Fairness Reprogramming](#)", 36th Conference on Neural Information Processing Systems (NeurIPS'22), [PDF].

- [10] H. Li, S. Zhang, M. Wang, **Y. Zhang**, P. Chen, S. Liu "[Theoretical Characterization of Neural Network Generalization with Group Imbalance](#)", [link], submitted to ICLR 2023 (rating 6.6).

RESEARCH OF INTEREST

Bilevel Optimization in Deep Learning: Theory, Algorithm, and Application

02 2019 - Present

Bi-level optimization (BLO) is a challenging mathematical problem, while many of the deep learning tasks can be naturally formulated as a BLO and thus, the effective and efficient algorithms to solve BLO is cherished by the research community. My research in this direction are as follows:

- Summarize different BLO formulations and corresponding theories/algorithms in deep learning. Develop a ToolBox for BLO in Python (current work) .
- Design effective and efficient BLO algorithms for specific deep learning tasks, such as pruning [1] and adversarial training [4, 8].
- Provide new perspectives to interpret the current deep learning tasks and possible existing algorithms from the lens of BLO.

Related publications/submissions: [1, 4, 9]

Trustworthy Machine Learning: Robust, Interpretable, and Fair

02 2019 - Present

The robustness of the deep learning models have become a research hotspot in the last decade. However, to build a trustworthy machine learning algorithm requires more than robustness. My research interest in this topic is summarized as follows:

- Design effective, efficient, and scalable robust training algorithm [3, 4, 8] to improve the adversarial robustness.
- Improve the fairness of the model [2].
- Design defense strategy against backdoor attacks [5].

Related publications/submissions: [2, 3, 4, 5, 6, 8]

AWARDS

• NeurIPS Top Reviewer	2022
• NeurIPS Scholar Award	2022
• Best Paper Runner-up Award, UAI 2022	2022
• UAI Student Scholarship	2022
• Travel Grant Award of ICML 2022	2022
• National Scholarship, by Ministry of Education of China (Top2%)	2017
• National Scholarship, by Ministry of Education of China (Top2%)	2016

PROFESSIONAL ACTIVITIES

- **Reviewer:** ICLR'22, ICML'22, NeurIPS'22, AISTATS'23, ICLR'23, ICASSP'23, CVPR'23, TMRL
- **TPC** for KDD'22 Workshop 4th Workshop on Adversarial Learning Methods for Machine Learning and Data Mining.
- **Student Chair** for ICML'22 Workshop AdvML: New Frontiers in Adversarial Machine Learning.
- **TPC** for NeurIPS'21 Workshop NFFL: New Frontiers in Federated Learning: Privacy, Fairness, Robustness, Personalization and Data Ownership.

SKILLS

Programming Languages Python, C++, Java, C

Libraries PyTorch, OpenCV, NumPy, Matplotlib.
